

SAATHVIK KALEPU

Full Stack Developer | AI & Cloud Enthusiast

saathvikk202@gmail.com (+91) 9908179816 Hyderabad, India saathvik-kalepu-17041228b saathvik-codes

EXPERIENCE

Software Engineering Intern — AI & Full Stack

aimaster.live

2024 – 2025 (6 Months) Remote

- Developed RESTful backend services and APIs following OOP principles, clean code standards, and layered architecture patterns for production-grade reliability.
- Built and maintained CI/CD pipelines using Git; wrote unit tests (xUnit-style) and debugged production issues across frontend and backend services.
- Participated in agile sprints, peer code reviews, and sprint planning; delivered features incrementally with consistent quality.
- Delivered the **Unicounsel** student counselling platform end-to-end — TypeScript frontend, Firebase real-time integration, and Node.js backend.

PROJECTS

TruthLens AI — Multimodal Misinformation Intelligence Platform

javascript, nlp, computer vision, explainable ai, rest apis

2025

- Built a platform detecting **fake news, deepfakes, and misleading content** using NLP, computer vision, and explainable AI with a credibility scoring engine.
- Designed a modular pipeline (text analysis → image authenticity → XAI explanations); each stage independently testable with human-readable, auditable verdicts.

CogniShield — Explainable Behavioral Security Platform

python, machine learning, behavioral biometrics, shap, windows api

2025

- Engineered a behavioral anomaly detection system using keystroke dynamics and mouse-movement biometrics on Windows; trained ML classifiers on real behavioral feature sets.
- Integrated **SHAP-based explainability** to generate per-event, human-readable security alerts; project received **2 forks & 1 star** on GitHub.

Serenity — AI Mental Wellness Platform

typescript, react, python, flask, nlp, firebase, rest apis

2025

- Full-stack mental wellness app with **NLP-driven mood analysis**, AI journaling prompts, and real-time Firebase sync across client and server.
- Type-safe React frontend (TypeScript) with responsive layouts; Flask backend handles concurrent requests with structured logging and error handling.

EDUCATION

B.Tech in Computer Science & Engineering

IITDM Kurnool, Andhra Pradesh

Expected 2027 CGPA: 8.2

Class XII (Intermediate)

Valley Oak Junior College, Hyderabad

2021 – 2023 98.8%

Class X (SSC)

Dr. KKR Gowtham High School, Hyderabad

2020 – 2021 CGPA: 10.0

SKILLS

PythonJavaJavaScript

TypeScriptC++SQL

ReactNode.jsExpressFlask

REST APIs

MongoDBPostgreSQLFirebase

MySQL

DockerAWSGitCI/CD

NLPscikit-learnSHAP / XAI

TailwindCSS

ACHIEVEMENTS

- Solved **500+ problems** on LeetCode — strong DSA proficiency
- Built and published **5+ full-stack & AI/ML** projects on GitHub
- CogniShield** — 2 forks & 1 star; **Serenity** — 1 star on GitHub
- Active in **hackathons** & competitive coding contests

PARTICIPATION

- NSS Volunteer — community development & social service
- Technical Club Member — peer learning at IITDM
- NSO Participant — sports, teamwork & leadership
