

SAATHVIK KALEPU

SOFTWARE ENGINEERING INTERN • FULL STACK DEVELOPER
AI & CLOUD ENTHUSIAST

✉ saathvikk202@gmail.com

☎ +91-9908179816

📍 Hyderabad, India

🌐 [linkedin.com/in/saathvik-kalepu-17041228b](https://www.linkedin.com/in/saathvik-kalepu-17041228b)

PROFILE

- Software Engineering student with strong foundations in computer science fundamentals, data structures, and algorithms.
- Experienced in designing, developing, testing, and deploying scalable software solutions using modern engineering practices.
- Proven ability to learn new technologies quickly, collaborate with cross-functional teams, and deliver high-quality software in fast-paced environments.

SUMMARY OF EXPERIENCE

- Hands-on experience building full-stack applications using modern frontend and backend frameworks.
- Exposure to cloud platforms, containerization, DevOps workflows, and scalable system design.
- Completed a 6-month industry internship focused on real-world AI and software engineering systems.
- Active participant in hackathons, coding competitions, and collaborative software development environments.

CORE COMPETENCIES

- Data Structures & Algorithms (Arrays, Trees, Graphs, Hashing)
- Object-Oriented Programming (OOP) and Software Design Principles
- Problem Solving, Debugging, and Code Optimization
- Scalable Backend Systems and API Development
- Software Testing, Reliability, and Performance Engineering
- Agile Development, Sprint Planning, and Code Reviews

EDUCATION

B.TECH IN COMPUTER SCIENCE & ENGINEERING

Indian Institute of Information Technology, Design and Manufacturing (IIITDM), Kurnool 📅 Expected 2027
CGPA: 8.2

INTERMEDIATE (CLASS XII)

Valley Oak Junior College

Percentage: 98.8%

📅 2021 – 2023

SECONDARY SCHOOL CERTIFICATE (SSC)

Dr. KKR Gowtham High School

CGPA: 10.0

📅 2020 – 2021

RELEVANT COURSEWORK

- Data Structures and Algorithms
- Object-Oriented Programming
- Operating Systems
- Database Management Systems
- Computer Networks
- Software Engineering
- Artificial Intelligence and Machine Learning

INTERNSHIP EXPERIENCE

SOFTWARE ENGINEERING INTERN (AI & FULL STACK)
aimaster.live

6 Months

- Applied software engineering principles to design and implement AI-driven and full-stack applications.
- Developed and maintained backend services with emphasis on scalability, reliability, and performance.
- Collaborated with product stakeholders and engineers to convert requirements into production-ready features.
- Performed debugging, testing, and code reviews to improve system quality and maintainability.
- Adopted new engineering tools, frameworks, and best practices to accelerate development workflows.

HACKATHONS & COMPETITIONS

- Adobe India Hackathon** – Built scalable, user-centric digital solutions in a competitive environment.
- Smart India Hackathon (SIH)** – Designed technology-driven solutions for real-world problem statements.
- AI & ML Innovation Hackathon** – Developed AI-powered prototypes using NLP and data-driven techniques.

PROJECTS

CROWDFUNDING PLATFORMFULL STACK DEVELOPER
Academic Project2024

Project: Secure Crowdfunding SystemClient: Self / Academic

Role(s): DeveloperTechnologies: React, Node.js, Express, SQLite, JWT

Responsibilities:

- Designed and implemented a secure, scalable crowdfunding platform using modular backend architecture.
- Applied data structures, authentication mechanisms, and transaction consistency principles.
- Implemented role-based access control, logging, and error handling for reliability.
- Optimized REST APIs and ensured secure data flow using JWT-based authentication.

SUPPLY CHAIN OPTIMIZATIONOPTIMIZATION ENGINEER
Academic Project2024

Project: Logistics Cost Optimization EngineClient: Self / Academic

Role(s): DeveloperTechnologies: Python, PuLP, Tableau

Responsibilities:

- Developed optimization models using linear programming for routing and demand allocation.
- Improved simulated logistics costs by up to 18% through algorithmic optimization.
- Visualized analytical results using dashboards for performance comparison.

SERENITY – AI WELLNESS APPFULL STACK DEVELOPER
Personal Project2025

Project: AI-powered Mental Wellness PlatformClient: Self

Role(s): DeveloperTechnologies: React, TypeScript, Firebase, Flask, NLP

Responsibilities:

- Built AI-driven features including journaling, mood tracking, and sentiment analysis.
- Applied NLP techniques to generate personalized emotional insights.
- Ensured secure cloud synchronization and encrypted user data storage.

UNICOUNSEL

📍 Internship Project

FULL STACK DEVELOPER

📅 2025

Project: Student Counselling Platform

Client: Aimaster.live

Role(s): Developer

Technologies: React, Node.js, MongoDB, Firebase

Responsibilities:

- Led a small development team to deliver a real-time student counselling platform.
- Designed multi-step assessments and role-based dashboards.
- Integrated external APIs and ensured production-ready UI using Tailwind CSS.

TECHNICAL SKILLS

- **Languages:** Java, Python, JavaScript, C++, SQL, TypeScript
- **Frontend:** React.js, Next.js, HTML5, CSS3, Tailwind CSS, Material UI
- **Backend:** Node.js, Express.js, Django, REST APIs, Microservices, WebSockets
- **Cloud & DevOps:** AWS (EC2, S3, Lambda), Firebase, Docker, Kubernetes
- **AI/ML:** NLP, Computer Vision, PyTorch, TensorFlow, Scikit-learn
- **Databases:** MongoDB, PostgreSQL, MySQL, Redis
- **Tools & Practices:** Git, Linux, CI/CD, Unit Testing, Debugging, Agile/Scrum

ACHIEVEMENTS & LEADERSHIP

- Led a development team during internship to successfully deliver a production-grade application.
- GitHub Campus Expert – recognized for technical community leadership.
- Solved 500+ problems on LeetCode (Top 10% globally).
- Active participant in hackathons, coding contests, and engineering workshops.

EXTRA-CURRICULAR ACTIVITIES

- **NSS Volunteer** – Participated in social service and community development programs.
- **NSO Participant** – Engaged in sports and fitness activities promoting teamwork and discipline.
- **Technical Club Member** – Participated in workshops, peer learning, and technical seminars.
